

Shafayat Hossain Masum

Principal Software Engineer & Cloud Architect

✉ shafayat.masum@example.com ☎ +1 (555) 349-8201 📍 San Francisco, CA 🌐 shafayat.dev

🌐 linkedin.com/in/shafayat-masum 📄 github.com/shafayat-masum

Authoritative and results-driven Principal Software Engineer with 10+ years of expertise in architecting high-throughput distributed systems, event-driven microservices, and multi-region cloud infrastructures. Proven track record of scaling enterprise platforms from 0 to 10M+ daily active users while mentoring 30+ senior engineers.

CORE TECHNICAL COMPETENCIES

Languages:

TypeScript Python Go Rust SQL

Frameworks & DBs:

React Next.js FastAPI Node.js PostgreSQL Redis

Cloud & Infrastructure:

AWS (ECS, Lambda, RDS) Kubernetes Docker Terraform

CI/CD Pipelines Kafka

Architecture & Leadership:

System Architecture Technical Strategy

Cross-functional Mentorship Engineering Standards

PROFESSIONAL EXPERIENCE

Principal Software Engineer at **Apex Cloud Technologies** • San Francisco, CA

2022 – Present

- Spearheaded the technical roadmap and migration to micro-frontends and event-driven FastAPI microservices, reducing API response times by 42%.
- Architected real-time streaming pipelines processing 15,000+ RPS using Apache Kafka and Redis cluster caching.
- Mentored 18 cross-functional engineers and established RFC design review standards across 4 distributed squads.

Lead Systems Architect at **Nexus Scale Labs** • Austin, TX

2019 – 2022

- Designed multi-tenant cloud architectures on AWS with automated Terraform provisioning, reducing cloud spend by \$180k/year.
- Championed zero-downtime database sharding and migration strategies across 50M+ customer records in PostgreSQL.
- Implemented end-to-end telemetry (OpenTelemetry, Prometheus, Grafana) improving incident MTTR by 60%.

Senior Full Stack Engineer at **Vanguard Systems** • Remote

2016 – 2019

- Built modern single-page dashboard apps using React and WebSocket real-time updates for enterprise analytics.
- Optimized core database queries and connection pooling, boosting throughput under peak traffic.

KEY PROJECTS & OPEN SOURCE

OmniStream: High-Throughput Event Broker [Go, Kafka, Docker] github.com/shafayat/omnistream

An open-source low-latency stream processing engine handling 100k events/sec with sub-millisecond p99 latency.

ResumePro AI Parser & Engine [React, FastAPI, PostgreSQL] github.com/shafayat/resumepro

Full-stack ATS resume builder with automated PDF extraction and vector-rendered PDF document export.

EDUCATION & ACADEMIC BACKGROUND

M.S. in Computer Science (Distributed Systems), Georgia Institute of Technology (Atlanta, GA)

2014 – 2016

GPA 3.9/4.0 • Research in Byzantine Fault Tolerant consensus algorithms.

B.S. in Computer Science & Engineering, University of Engineering and Technology (Dhaka)

2010 – 2014

Dean's Honor List • President of Competitive Programming Club.
